

Summer Camp Director

Summer Camp Director enables you to run an entire program outside of the academic year. Enrollment in summer activities is not contingent upon enrollment during the regular year; attendees can be current or non-attending students of the school. For multiple sessions and limitless classes, Summer Camp Director will minimize organizational effort as you set up courses, enroll students, take attendance, manage schedules, and track custom fields created specifically for your summer program. Allow the system to assign students automatically, or place them in a course depending upon their requests.

Reports include:

- Attendance by Day or Class
- Class Rosters
- Classes Assigned
- Classes Requested
- Custom Field Tracking and Questions
- Field Trip Permission
- Mailing Labels
- Medical Form Submission
- Student Lists by Grade
