

Alumni Reach

Achieve's Alumni Reach allows you to easily keep in touch with your Alumni! Graduates and former students can sign up for an Alumni Portal account, where they can update their demographics, upload images and biographical content, share social media links, professional information, and more. Alumni can keep in touch with your school and with their fellow alumni. Alumni Reach provides a fun and secure way to keep your Alumni family together!

Highlights:

Sign up screen is easily configured and can be placed on your school's marketing website. The Alumni enters their name and birthdate. If the system finds a match, it will automatically send them their Portal credentials.

Alumni Reach includes a demographics screen where the Alumni can update contact information, such as current address, phone, cell, email address and more.

Social media can be shared with their fellow Alumni, such as Facebook, Twitter, Linked In, Instagram, Pinterest, etc.

The alumni can choose to share their educational accomplishments and degrees. They can enter as many education institutions as they wish.

Employer information can also be shared. If the Alumni desires, they can let others know where they work and what their profession is.

A comment screen is provided. The alumni can update their profile with images and as much descriptive content as they wish!

The alumni directory and look up feature allows alumni to find others in your Alumni family. The alumni can choose to be in the directory, and decide which information they would like published or not. A blind email feature allows alumni to email each other, without displaying their actual email address.

Alumni Reach is a fun, easy way to keep your alumni in touch with your school and with each other. Because graduation is just the beginning!
